## **MEW/ITB/25/2018 – Invitation to Bid (ITB) for Financial Support for Electricity from Solar Photovoltaic Installations with capacity of 1000kWp or more**

Reference is made to the scheme in caption for which the deadline for submission of offers is the 26<sup>th</sup> October 2018 at 1200hrs CET.

Here-under please find a clarification which is construed to form an integral part of the ITB document.

### **Clarification No 4-**

#### **Question**

Reference is made to Volume 1 Section 1 - Instructions to Bidder in particular Section D. 22 enabling the Contracting Authority to extend the deadline for submission of bids by issuing a clarification note in accordance with Clause 9.

In view also of the fact that a significant part of the period between the issuing of the ITB and the current deadline for submission of bids was during the holiday period it would be appreciated if you could consider an extension of the deadline in order to allow us enough time to satisfy and submit a proposal that meets all the established criteria.

An extension of 10 working days would be greatly appreciated.

#### **Reply**

No extensions to the deadline for submission are envisaged. The “holiday period” was taken into consideration when the launch data and deadline for submission were determined.
